Transmission from Beyond?

A scrambled VHF 4th dimensional transmission has been received and captured by the investigative branch of Viva Kittery. The signal appears to be that of the Time-Traveler. How else could we be receiving 4th dimensional TV signals?

The Viva Kittery investigation team closely examined and was able to make out the Time-Traveler's iconic goggles. With this unquestionable observation, the transmission must be genuine. The audio was put through a high tech filter and the following conversation fragment was uncovered:

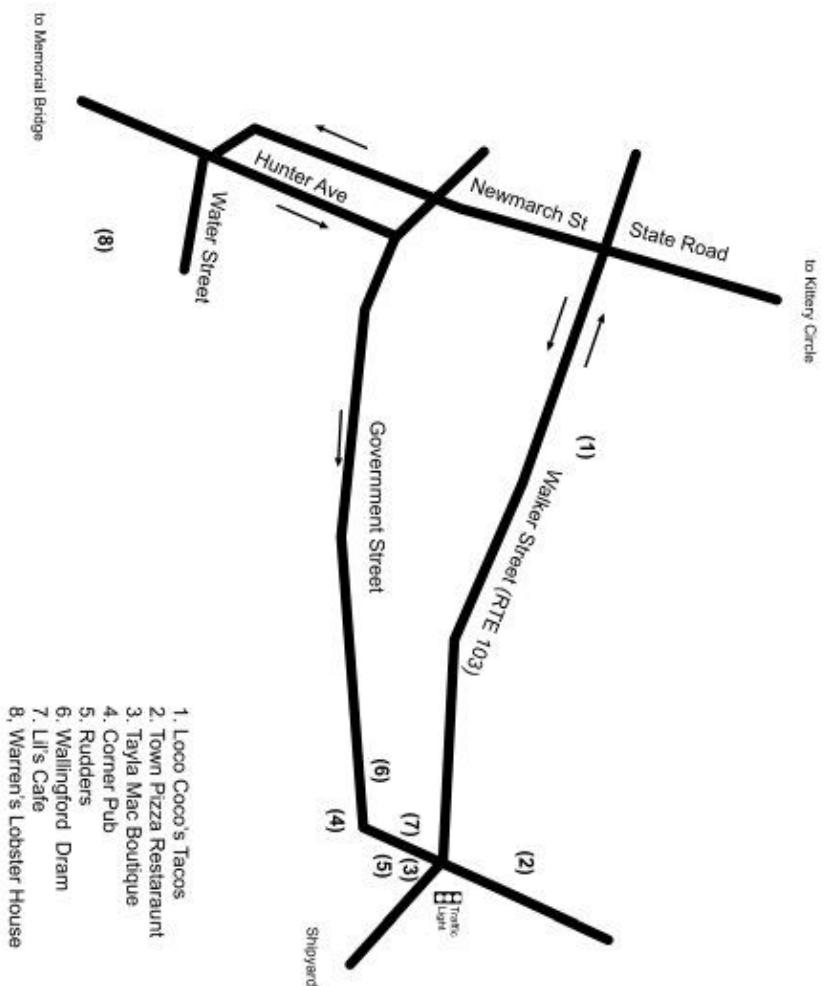

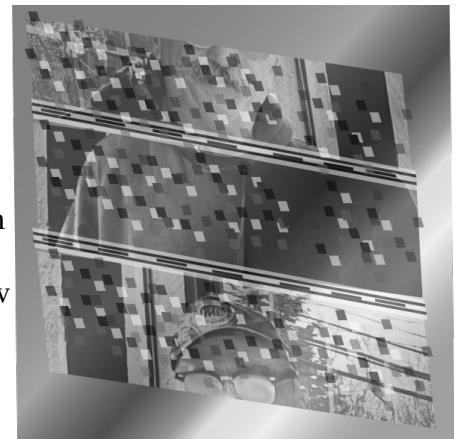

Male voice (Time-Traveler?):

Delivered monosyllabically, "One-Thought is here and everywhere. I believe it is welcomed everywhere. It is just easier for everyone and everyone agrees. But wait, you must..."

Further analysis of the communication fails to reveal more.

Viva Kittery Editorial on One-Thought

Many have started to notice and hear about One-Thought. Some feel One-Thought is a radical movement and is gaining momentum. It is attributed by them that know, to an international conspiracy by billionaires bent on reducing resources consumed by the masses and distributed through social media. With One-Thought you are encouraged, rewarded or coerced not to think. The transmission

appears to be a veiled warning from the future. Is it too late to stop One-Thought evolution? Is One-Thought actually better for all humanity? This writer is reserving judgment.

Public questions One-Thought

Viva Kittery on-the-street reporting has heard these questions from the public and has provided responses from the Viva Kittery investigative team.

What happens if my lawn is lush and green but One-Thought is clear that no lawn shall be lush and green?

It is clear that burnt lawns save water and maintenance. Burnt lawns don't require mowing. Under One-Thought you would be sent to a re-education program and your resources assigned to an unquestioning person. Your lawn would become burnt. It is just one more proof that One-Thought is beneficial to all.

Another asked, how do disagreements with One-Thought get resolved?

With One-Thought there can be no disagreement so there can be no discord. Re-education would be swift. It is evident that One-Thought removes conflict.

Is One-Thought legal?

How can something so pure not be legal? If everyone agrees. it must be so. It is ultimate democracy, the majority rules. There is One-Thought. Nothing could be better.

Viva Kittery is most humble and grateful to report on One-Thought first. People ask how did a little paper like Viva Kittery break the story of the century?

The reply, simple honest observation and reporting my friends.
