LOST AND FOUND

Viva Kittery's very own reporter. Sly Nickles has a profound story to recite.

MAN goes on mysterious 40 day journey to find something he lost! This story will make you wonder!

A man..lost something. "where the heck is it?" he peeped out. I have my watch..wallet.. universal id.. but where the heck's my key ring?

Can't drive without my keys... his tensions were enough to melt unlit candles!

Searching the bed, the floors, the washer, the dryer' ...the cupboards.. the under chairs and couches ..the cushions .. the pillows ..the cupboards and the drawers.. in less than 30 minutes the stress took a year off this mans life!

Sweat poured out as he decided to "backtrack" his steps..where he has been that day...but he had to walk because he lost his key ring.

So down the road he went..to stores.. he slept there waiting for the store to open..gas station where he had stopped.. He walked for 40 days and nights going everywhere he could think of.. on foot.. and returned home ... too worn out now to feel panic.

Then in a blurred instance of calm resolve he opened the car door..and lo and behold the keys were on the seat..

He chuckled as he thought of his panic.. the loss of time..the cold and hungry nights on foot searching for his keys..

When he recited the story to a friend he said.. you know I got so caught up with where I lost my keys I didn't stop to think that I drove home so they must be here.

Funny huh?

His friend said..yeah..not really. .. I go thru that all the time..its a nightmare..

Now let me tell you about loosing my watch..
